

THE FUTURE OF LIQUID HEATING FUELS

Putting the Pieces Together

MAY 20 & 27, 2021 VIRTUAL CONFERENCE

Presented by
 **eurofuel**
The European Heating Oil Association

**NORA**
NATIONAL OILHEAT RESEARCH ALLIANCE

FRENCH BIO EXPERIMENTATION

Thierry JAVIT

EUROFUEL-FF3C

HEATING OIL in FRANCE

3 millions individual houses
mainly off grid network

0,4 million flats
in builings

10 millions of people
warmed by heat oil

FRENCH BIO EXPERIMENTATION

- 2015 : Following the COP 21 decisions, some measures were taken in Europe in order to reduce the CO2 emissions.
- Nov 2018 : The French government announce the end of Heating Oil System for 2028.

April 2019 : <https://france3-regions.francetvinfo.fr/provence-alpes-cote-d-azur/monaco-palais-princier-se-chauffe-desormais-au-colza-1662083.html>

- June 2020 : French Climate Conference proposals : *replace boilers during a global renovation by 2028*
- July 2020 : Government announcement to limit CO2 emissions to 250 gr for new boiler in 2022

(Heating oil = 270 g CO2e / kWh PCI , Natural gaz = 227 g , Biofioul F30 = 224 – 232 g)

BIOFIOUL F30

- An Agreement between Organisations:
- FF3C the Heating Oil major representative Organisation (900 / 1200)
- FOP French Oil Producers (Agriculture)
- FFPI French Petrol Importors
- Heating Devices Producers
- Heating installers

BIOFIOUL F30

- 70% FOSSILE, 30% FAME (Rap Seeds)
- We asked the Parliament to adapt the Energy Taxation on only the fossile part (Tax law for 2022....)
- CETIAT : Laboratory tests from october 2020 to june 2021
- New tests underway with boiler industry for end 2021 with F30 and more...
