- NORA Silver or Gold Certified Technician instructor(s)**
If the Instructor is not certified, they can take the Silver Certification exam online as long they have a minimum three years field experience with liquid heating fuel appliances
- Curriculum following the NORA Technicians Manual for Liquid Heating Fuels**
NORA approval required. [Sample curriculum.](#) [More about the manual.](#)
- Online Bronze Certification Technician Exam administered/proctored**
- Online student testing capability**

STEP 2

Fill out the application form at:

- [NORAweb.org/nora-certified-technical-school-application](https://www.noraweb.org/nora-certified-technical-school-application)
- Or scan 

STEP 3

Consult with NORA:

- Have an online meeting with NORA education to review your application and set your facility up to become a NORA Approved Technical Training Facility.**

“The NORA training and certification I received have helped me in establishing my career as a service technician. I’ve been on my own in the field for a year and it’s a great feeling when I can solve problems and restore a customer’s heat using my skills and training.”

Lianna F.,
NORA Certified Technician

About Bronze Certification

The bronze certification is for entry level technicians with minimal field experience. Classroom hours are spent on the critical elements of a liquid fuel fired (oil) heating system: including: combustion, basic electricity, venting & hydronic systems.
