NORA Board Meeting Newport Marriott Hotel & Spa Salon II September 28th, 2023 11:00 am

I. **Introduction** – Chairman Roger Marran & President Michael Devine called the meeting to order at 11:15 am.

The following members of the NORA Board of Directors were in attendance and constituted a Quorum.

Roger Marran Kate Duffey Rick Bologna Eric DeGessero Allison Heaney Mario Bouchard Dan Mattice Jacqueline Hart Ted Noonan **Steve Powers** Greg Childs David Coyne Bobby Parlett Chris Fazio Kristyn Schweitzer John McCusker Dave Walton Mark Caspers Leann Pannebianco Carter Vaillancourt

II. **Approval of Minutes-** A motion was made by Jacqueline Hart and seconded by Rick Bologna and the minutes of the May 22nd NORA Board of Directors meeting was submitted and approved.

III. Financial Information –

NORA 2022 Audit – Natasha Perkins Auditor / UHY LLP provided a detailed synopsis of the 2022 NORA Audit and its process.

- Our audit was designed to provide reasonable, not absolute, assurance the financial statements are not materially misstated.
- Our audit is a risk-based approach where we focus our procedures on the potential risks identified in the required communications letter listed in other Audit Findings and Issues section.
- The audit report is an unmodified audit report, the best possible result.
- The audit report contains an emphasis of matter that refers to Note 10 of the footnotes regarding the implementation of a new accounting pronouncement (Accounting Standards Update No. 2016-02 Leases (Topic 842)).
- The new accounting standard resulted in a new asset an operating right-of-use asset of \$274,512 for the remaining ability to use the lease at the liquid fuels research center and an operating lease liability of \$281,314 for the present value of the remaining obligation to pay for the rent of that space.
- Overall assets increased due to the increase in the cash held in escrow as required by the NORA statute.
- Overall obligations to the states remained consistent year over year indicating states have been spending their current year budgets. \$4.6 million remains unspent by states.
- Central (National) RD&D spending exceeded current year budget in an effort to spend down amounts that had accumulated to be spent by \$787,000 including \$371,000 that was granted to

states from the Central budget as part of the \$2 million available for those states that fully utilized their RD&D budgets.

- The remaining balances for Central spending not yet utilized over the years are:
 - o RD&D \$4.2 million,
 - o Efficiency & Upgrade \$193,000, and
 - o Consumer Education \$193,000.
- Total net assets unavailable for obligation to be escrowed under the statute is \$8.0 million
- Net Assessments revenue exceeded budget and therefore, RD&D and Efficiency & Upgrade spending fell short of the required minimums of 30% and 15% respectively. Consumer education and administrative costs were within their required maximums of 30% and 7%. To address the shortfall, a budget amendment is necessary. To address this for the future, the 2024 and 2025 state grant budgets have been increased for RD&D and Efficiency & Upgrade to 31% and 16%. The resolution needed from the Board is on the last page.
- During our audit, we identified no material weaknesses like we did in prior year.
- We noted the following significant deficiencies, which are less severe than a material weakness. All resulted in journal entries proposed by us and made by management during the audit:
 - Accounts Payable was Understated certain invoices paid in 2023 for services received in 2022 were not accrued for Central (national activities)
 - o <u>Accounting for Publication Sales</u> inventory was overstated, publication sales were understated, and cost of sales were understated.
 - <u>Classification of Designated Net Assets</u> net assets obligated under contract by NORA for central (national) RD&D projects was understated.
 - Accounting for Prepaid State Assessments The amount a state exceeded their consumer
 education grant by should have been recorded as a prepaid state assessment asset rather
 than a reduction to the state grant liability.

A motion to approve the NORA 2022 Audit was proposed by Bob Parlett and was seconded by Jacqueline Hart, there was no discussion and all were in favor.

NORA 2022 Budget Resolution – Because of the larger than estimated fuel sales in 2022, the Board of Directors updated the 2022 budget to increase the Research and Development & Energy Efficiency categories.

Now Therefore Be It Resolved: In 2022, assessments revenue net of amounts required to be maintained in escrow exceeded the original budget for 2022.

Be it Further Resolved: As a result, the original budgets for central spending on the research, demonstration, and development program and the heating oil efficiency and upgrade program were insufficient to meet the minimum requirements of Public Law 113-79 that requires a minimum of at least 30% of assessments revenue for research, development, and demonstration and a minimum of at least 15% of assessments revenue for heating oil efficiency and upgrade.

Be it Further Resolved: Therefore, the original budget for 2022 is amended to increase the central research, development, and demonstration budget from \$1,270,000 to \$1,296,784.43 (an increase of \$26,784.43).

Be it Further Resolved: The original budget for 2022 is amended to increase the central heating oil efficiency and upgrade budget from \$60,000 to \$73,142.94 (an increase of \$13,142.94).

A motion was made to accept the resolution as stated by Bob Parlett and seconded by Jacqueline Hart, there was no discussion, and all were in favor.

NORA Budget 2024 – 2025 – President Michael Devine provided a review of the 2024 – 2025 NORA Budget for review. Michael shared with the Board that the NORA Budget Committee and the NORA Executive Committee had met independently regarding the budget and had unanimously approved the budget for submission. Michael made the point, following the presentation, that the budget has been released to the public and that we were still in the public comment period, so we would approve the budget with the understanding that changes could be made based on public feedback. Subsequent to this and following the presentation of the 2024 & 2025 budget Ted Noonan made a motion to approve the budget as presented and Allison Heaney seconded the motion, there was no additional discussion and all voted unanimously to approve the 2024 & 2025 NORA budget.

NORA Financial Reporting Changes – Michael Devine provided an overview regarding of some of the initiatives that NORA is undertaking on improving the financial reporting activities. NORA has engaged the service of O'Conner Consulting to provide an evaluation of the NORA financial reporting processes and activities to help evaluate how we can improve our financial reporting. The evaluation suggests that NORA should consider employing a full-time employee whose role would be identified as a Controller. O'Conner Consulting is presently creating a job description for this role and has also helped to identify a consultant that they have worked with to assist us with the job search for this role. NORA hopes to have this new employee in staff by January of 2024.

IV. NORA May – September 2023 Activities – President Michael Devine

Energy & Policy Institute – Michael Devine reported to the NORA Board of Directors that the Energy & Policy Institute has just made a new request of NORA for information regarding the activities of the states of Rhode Island & Vermont. This is the second request from this entity this past year.

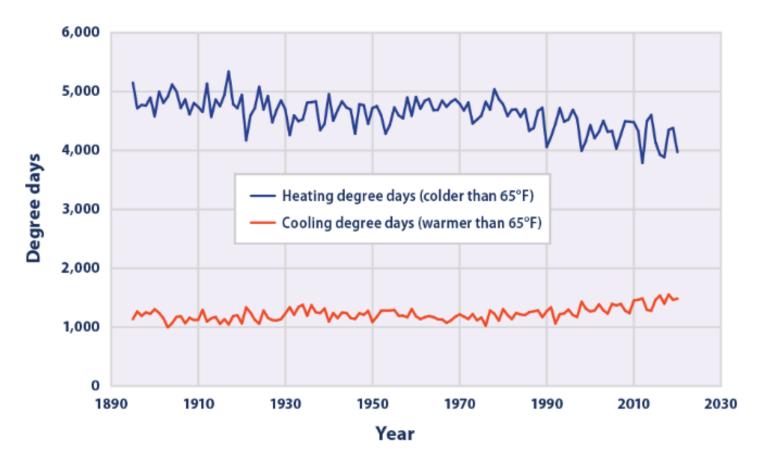

NORA-CFAA Collaboration – Michael Devine reported that NORA & CFAA have engaged in a new Research and Development contract, whereby CFAA will contribute \$450,000 dollars towards the biodiesel and renewable diesel testing projects that the NORA team is engaged in, with advancing the blending levels of renewable fuels into liquid heating burners and appliances. NORA is very grateful for this collaboration with the CFAA Technical Team led by Scott Fenwick and Steve Howell.

NORA & CFAA - High Blends Infrastructure Workshops & CSR Bootcamp – In July and August, NORA & CFAA collaborated in producing two High Blend Infrastructure workshops and two CSR Bootcamps. These events were held in Needham, Massachusetts and Greenwich, Connecticut. Enclosed in this NORA Board packet is a synopsis of these events prepared by Consumer Focus.

- V. Research and Development, Director of Laboratory Dr. Thomas Butcher Report enclosed
- VI. Education and Training, Bob O'Brien Report Enclosed
- VII. Old Business NORA Name Change During the May 22nd Board of Directors meeting a suggestion arose reading the prospect of changing the name of the National Oilheat Research Alliance to another name that does not include the term "Oilheat". Michael Devine shared that there have been several discussions that have occurred with our in-house council and other industry participants to consider this question and how and when would be the best way to make such a transition.
- VIII. New Business There was no suggested new business.
- IX. **Adjournment** A motion to adjourn was made by Allison Heaney and seconded by David Coyne.

During the last 125 years there has been an average national decline in degree days of **0.14%/ loss per year**

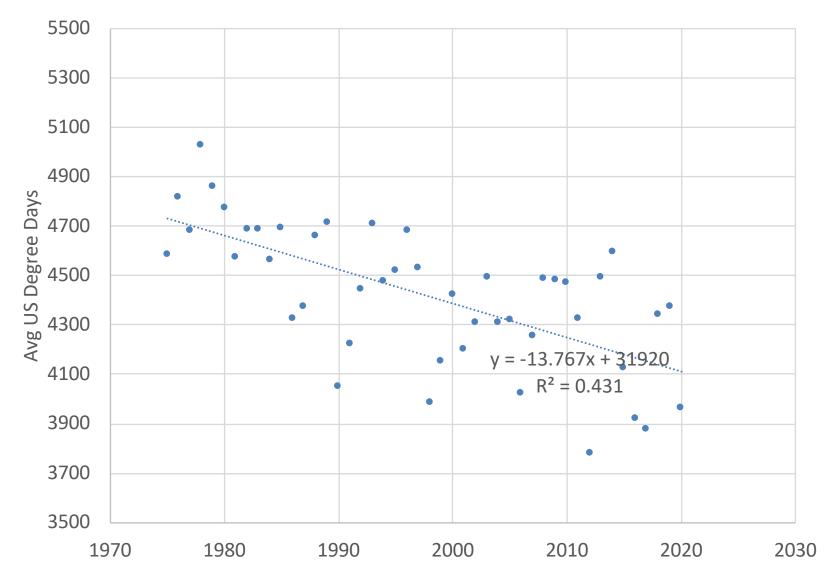

Source: https://www.epa.gov/climate-indicators/climate-change-indicators-heating-and-cooling-degree-days

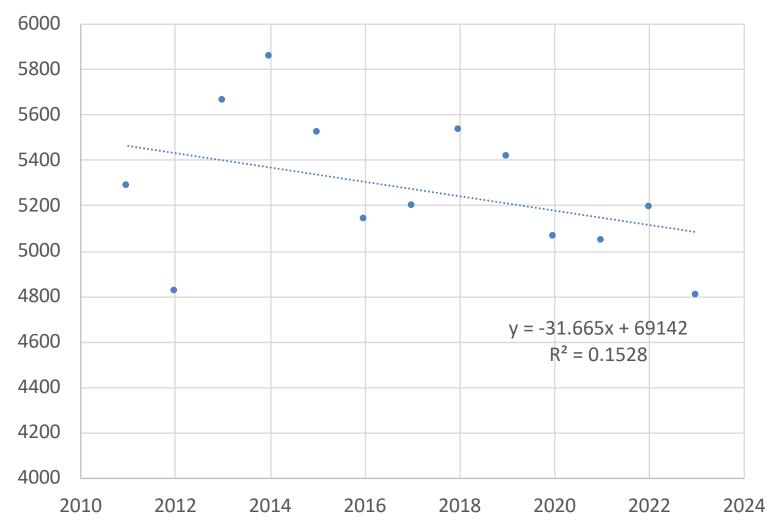

Using the same EPA source, looking at 1975 to 2020 U.S. Average. Slope = -13.767-degree days per year. **0.31% loss per year**

Average of 7 cities – 2011 to 2023 Annual Degree Days. Slope = -31.665 DD/year 0.60% loss per year

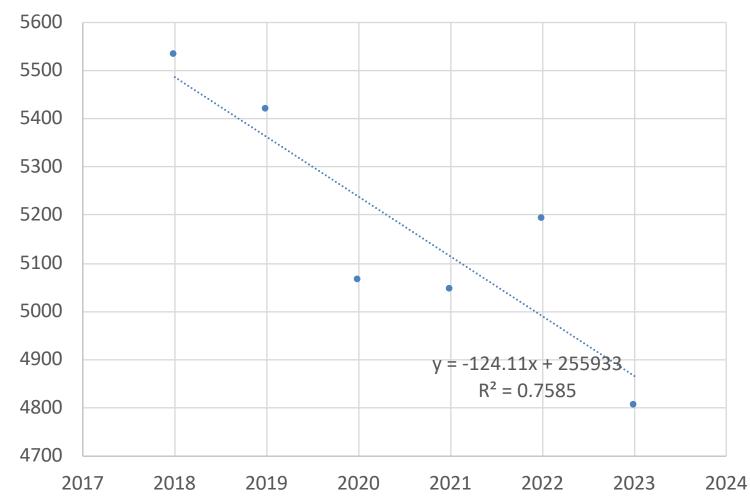

Average of 7 cities – 2018 to 2023 Annual Degree Days. Slope = -124.11 DD/year 2.4% loss per year

Declining Heating Gallons

- Declining Degree Days over the last 5 years 2.4% Year over Year
- Same trend decline this past heating Season
- 2022- 2023 gallons off an additional 6% why?
- Consumer behavior & economy
- Improved Equipment Efficiency
- Competition from Propane & Heat Pumps
- Is this an anomaly?

YE 2023

National Oilheat Research Alliance, Inc. Financial Summary For the Year Ended December 31, 2023

NORA ended the year with a net surplus of \$898K. The annual escrow is calculated as part of the audit and will continue to be reflected as a variance until the audit is finalized.

Collections were approximately \$8.3 million as of December 31st.

Central program expenses of \$2.1 million are behind budget by \$401K through December 31st.

States and Rebates program expenses of \$3.3 million and \$922K, respectively, are over budget by \$616K due to the \$2 million additional Research & Development funds allocated in 2021 and 2022, respectively.

The Unallocated or non-programmatic expenses are approximately \$262K as compared to an annual budget of \$368K.

As of December 31, 2023, the NORA Statement of Financial Position continues to be very strong with \$9.2 million in available cash and \$8.1 million in escrow. This is offset by \$4.1 million in grants payable to the participating states and \$1.9 million in other liabilities. Accounts payable is current as are the other accrued expenses. Net assets are in excess of \$13 million.

Assessments Receivable of \$2.4 million is current and represents amounts due from customers. The balance due from customers as of May 14, 2024, is approximately \$137K, which is expected to be collected during 2024.

During August 2022, NORA entered into a \$350,000 contract with Clean Fuels Alliance America ("CFAA") for Research Development. As of December 31, 2023, NORA has incurred \$350,000 in expenses; \$77,948 during 2022 and \$272,052 during 2023.

During July 2023, NORA entered into a \$450,000 contract with Clean Fuels Alliance America ("CFAA") for Research Development. NORA received the first installment of \$236,500 during August 2023 and the second installment of \$213,500 during October 2023. As of December 31, 2023, NORA has incurred \$74,510 in expenses. The remaining balance of \$375,490 is classified as deferred contract revenue on the Statement of Financial Position at December 31, 2023.

Statements of Activities.	4

National Oilheat Research Alliance, Inc. Financial Summary For the Three Months Ended March 31, 2024

NORA operated at a deficit of \$1.6 million for the first three months of the year. This is the result of recording the state program expenses (Consumer Ed & Training, Research & Development and Home Efficiency) and state rebates in their entirety up front. Whereas the revenue/collections are recorded throughout the year. We expect this to smooth out as we continue to receive collections.

Collections were approximately \$2.7M for the first three months of the year. This represents 34% of budgeted annual collections.

The annual escrow is calculated at year end and will continue to be reflected as a variance throughout the year.

Central program expenses of \$441K are behind budget by \$1.2 million through March 31st as the expenses were not incurred.

States and Rebates program expenses of \$3.1 million and \$672K, respectively, are over budget by \$93K due to the \$2 million additional Research & Development funds allocated in 2021 and 2022, respectively.

The Unallocated or non-programmatic expenses are approximately \$85K as compared to an annual budget of \$356K. We expect the expenses to be incurred in the remainder of the year which will result in reducing the variance.

As of March 31, 2024, the NORA Statement of Financial Position continues to be very strong with \$9.6 million in available cash and \$8.2 million in escrow. This is offset by \$7.3 million in grants payable to the participating states and \$1.1 million in other liabilities. Accounts payable is current as are the other accrued expenses. Net assets are in excess of \$12 million.

Assessments Receivable of \$2.5M is current and represents amounts due from customers. The balance due from customers as of May 14, 2024, is approximately \$671K, which is expected to be collected during 2024.

During July 2023, NORA entered into a \$450,000 contract with Clean Fuels Alliance America ("CFAA") for Research Development. NORA received the first installment of \$236,500 during August 2023 and the second installment of \$213,500 during October 2023. As of March 31, 2024, NORA has incurred \$174,894 in expenses; \$74,510 in 2023 and \$100,385 in 2024. The remaining balance of \$275,106 is classified as deferred contract revenue on the Statement of Financial Position.

NORA Research Update

Tom Butcher, Technical Director National Oilheat Research Alliance

Board of Directors Meeting
Eastern Energy Expo
Mohegan Sun, CT.
May 2024

New CFAA Scope of Work 2024 New Funding of \$550,000

Highlights / Key Changes:

- Expand In-Lab Head Coking Studies
- Expand High Blend Field Studies to include RD Blends
- Studies on RD and Elastomers
- Continue cold flow studies additives, heating
- Support industry work as needed
- Communication presentations, papers, participation

High Blend (B100) Field Testing - Key Findings

No system pump / seal / leak problems

No basic combustion problems

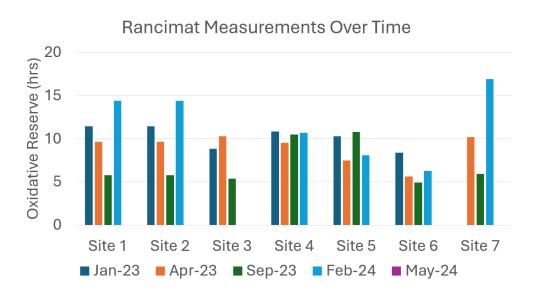

Fuel Quality remains good over entire year

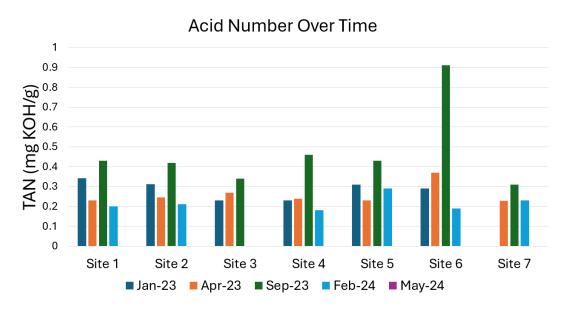

Some reduction in fuel quality over summer

Heating season deliveries enhance fuel quality

Fuel filterable particulates in many cases quite high

Head coking with high biodiesel blends in some cases remains a concern.

Field Studies – Head Coking 1 - Mass

Head Coking Factors

Hardware

Control settings

Cycling rates

Burner design

Combustion chamber "temperature"

Fuel heating.

Fuel

Trace components

Blends which increase lower temperature volatility.

Service Practices

Burner head cleaning protocols.

In-Lab Head Coking Tests

- 4-day testing performed at the NORA lab
- 3000 cycles, 60s on and 60s off
- Managed by lab control system
- Condition of head monitored before and after testing

B100

RD80/B20

RD50/B50

RD100

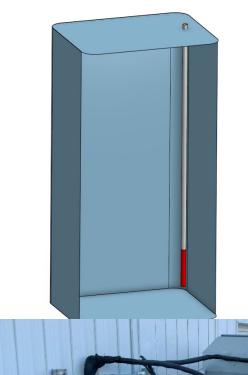

Blue Flame Burner

- As part of explorations, testing was done on a blue flame burner
- Buderus blue flame burner not in market, but an interesting approach since there is no head and fuel is vaporized before reaching flame zone
- Flame tube that contains entire flame and provides recirculation zone that cools it – cooler flame results in lower NOx
- Any fuel deposit is quickly evaporated
- No coking observed at all with B100

CEMA Tank Test 2023-2024

- 225W in-tank heaters in each tank programmed to turn on at 50°F air temperature
- Line heaters installed on supply lines also turn on at the same temperature
- Systems monitored by CEMA and periodic visits from NORA
- Successful operation throughout heating season 2023-24 without any failures, down to 10°F outside temp
- Thanks to CEMA folks for all their help and support

Concept for a Heated Outside "Shed"

NORA has started a collaboration with SUNY Morrisville, upstate New York, which includes integrating renewable liquid fuels with their course program.

As part of this we have designed and built a heated outdoor enclosure for B100.

Temperatures in this part of New York can fall below zero during the winter, proving a great test location.

Heated Tank Enclosure

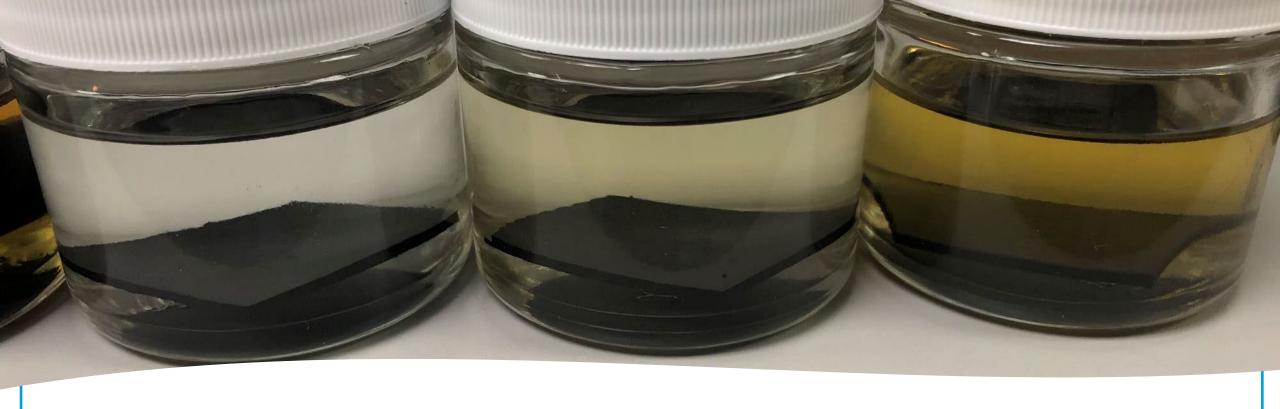

3" foam board insulation2 X 100 watt heating blankets in air spaceThermostat control

Limited testing has been done to date. Temperature as low as 12°F. Very good performance. To be continued next heating season.

Elastomer Testing

- Measuring the impact of Renewable Diesel and Biodiesel on the soft materials found throughout the industry
- Currently testing various Nitriles and Viton slabs with RD100, B100 and RD80/B20. More fuel blends planned

Ethyl Levulinate (EL)

EL Completed Testing

- Fuel blending/separation
- Elastomer compatibility
- Filter compatibility
- Long term storage
- Combustion properties
- Commercial level boiler testing
- EL100 field study

Planned Testing

Storage Stability – D4625.

Purpose – to evaluate if a storage stability specification for EL is needed. Explore changes in TAN and peroxide over time with water content as a parameter.

Steel Corrosion – D665.

Purpose – to evaluate if a steel corrosion specification is needed if EL meets all other specifications. Water content as a parameter

Draft ASTM Specifications for EL

Property	Test Method	Required Value
Density kg/m ³	D4052	1000 to 1020
Flash Point °C	D93A	>80
Kinematic Viscosity at 40 °C	D445	
min		1.4
max		4.0
Water, percent by mass	D1364	<1.0
Acid Number mg KOH/g, max	D664	<0.5

Accredited Instructor Program

- Instructors are technically oriented but....
- Improve classroom & teaching skills
- June 2023, January 2024
 June 2024

The NORA Accredited Instructor Program (AIP) ensures technicians trained in NORA schools, unions, and companies in the heating liquid heating fuels industry, have been provided with an education that positions them, their customers and their companies for success.

Facilitated by a professional "teaching" instructor, this intensive three-day program focuses on improving classroom teaching skills, presentation, class preparation and capacity to engage your students, to maximize their retention and comprehension of the subject. AIP uses live instruction, demonstration, and peer review.

NORA Accredited Instructors

+ Robert O'Brien

- Jefr Rozga

- Michael Warn

levelopment trainer for federal, state, and ndustry clients for the past five years. In addition she has applied adult learning theories and nstructional design best practices to create and local school districts. She also has 10 year of experience developing communications and ssociations, Ms. Huber has a BA in Multilingual/Multicultural Education and a master's in education in Instructional Design and Excellence in 2019 by the National Highway Institute and is the author of the Learners First Creating Engaging and Interactive Learning

Accredited Instructor Program

- Outcome & objective based education
- Three-day program
- Next session in June 2024

Biodiesel Quick Guide Card

 Actionable suggestions for field issues

- Wholesaler location training-unreached segment
- RD training

Alaska DOC

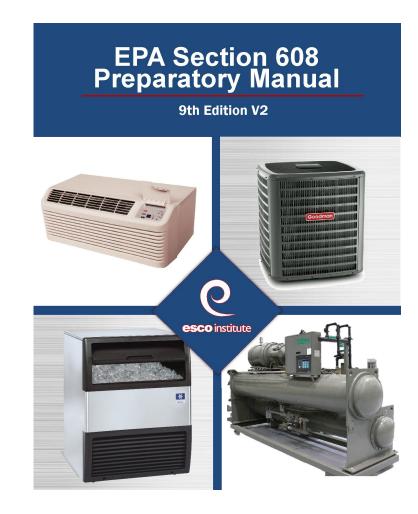

- Establish an oil-heating curriculum in multiple facilities
- Approved and out for bid
- Provide support

EPA 608 Testing

- NORA is approved to administer EPA 608 exams both in person and online
- Needed to purchase and handle refrigerants
- Hybrid systems

IECC

Adopted in whole or part by 49 states, including every oil-heat state

Commercial

- Successfully kept combustion of liquid fuels in the code
- Blocked heat pump infrastructure
- NORA submitted a proposal to include renewable liquid fuels as eligible to offset on site renewable energy requirements
- Passed subcommittee 9-2
- Failed in main committee 17-10

Residential

- NORA submitted a proposal to include Energy Star B20 rated Boilers & Furnaces as more efficient HVAC options to meet code requirements
- Passed subcommittee 5-2
- Failed main committee 19-10
- Proposed & passed new definitions

Appeals

- AGA and AHRI among others filed appeals
- Electrification infrastructure & Efficiency Options
- Appeal board declined appeals
- Executive board overruled
- Electrification to appendix
- Efficiency to reference

2024 International Energy Conservation Code [CE Project]

Add new definition as follows:

- **BIODIESEL BLEND** A homogeneous mixture of hydrocarbon oils and mono alkyl esters of long chain fatty acids.
- FUEL GAS A natural gas, manufactured gas, liquified petroleum gas or a mixture of these.
- FUEL OIL Kerosene or any hydrocarbon oil having a flash point not less than 100°F (38°C).
- LIQUID FUEL A fuel oil or biodiesel blend.

Fuel oil replaced by liquid fuels throughout code

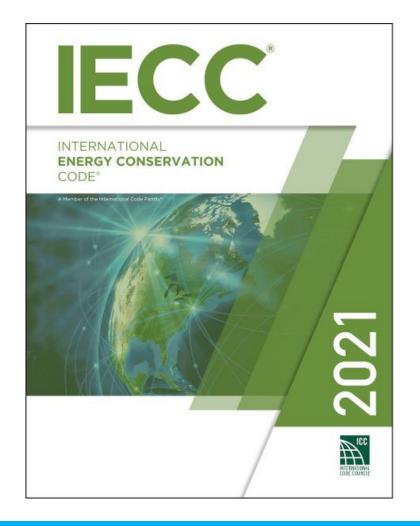

NORA Code Committee

Reps from across industry

Formulate plan to promote renewable liquid fuels as a decarbonization option

Organize a defensive strategy against anti-combustion and anti-renewable fuel proposals

Building Performance Association

- Exhibited in Saratoga

About NORA Certification

Technicians Manual

Technical Resources

Required Course

IMPORTANT

Effective December 9, 2022, all recertifications and certification upgrades require the course

Bioheat® Technical Guidance (NORA-109-1)

BRONZE CERTIFICATION

To upgrade to Silver Certification, twenty NORA approved credits (CUEs) are required along with three years in-field experience. Two of the twenty CEUs must come from the "Bioheat® Technical Guidance" course.

SILVER CERTIFICATION

To renew silver certification, twenty-four NORA approved credits (CEUs) are required. Two of the twenty-four CEUs must come from the "Bioheat® Technical Guidance" course.

GOLD CERTIFICATION

To upgrade to Gold certification, Silver certification is required along with five years experience and completing four of the NORA Gold Advanced courses. In addition to these, the "Bioheat® Technical Guidance" course is required.

To renew to Gold certification, twenty-four NORA approved credits (CEUs) are required. Two of the twenty-four CEUs must come from the "Bioheat® Technical Guidance" course.

Look for this course in "Online Courses"

May 6, 2024

Mr. Robert Anton RH at East Ames Court LLC 5 Aerial Way, Suite 100 Syosset, NY 11791

Re: Expansion and lease amendment for NORA at 131 East Ames Court, Plainview, NY

Dear Bob.

As agreed, please prepare lease amendments to include the following:

Tenant: National Oilheat Research Alliance (NORA)

131 East Ames Court Plainview, NY 11803

Mr. Michael Devine, Executive Director

Size: The size of the suite will be increased from 3,786 square feet to

approximately 5,927 square feet rentable, as per plan to be attached to the

lease amendment.

Lease As soon as work can be completed, on or about September 1, 2024.

Commencement:

Term: New term to expire December 31, 3032.

Workletter: Landlord will demise and construct the additional space as per plan

attached to the amendment, providing new plumbing, lighting, paint and

floorcovering (selected from Landlord's samples.)

Parking: Tenant will have parking for 20 cars, and may reserve three (4) of these

spaces for their exclusive use.

Mr. Robert Anton -2- May 6, 2024

Rental Rate:

Base rent will escalate by 3% on each anniversary of the lease commencement. Tenant's other additional rent obligations, e.g. increase in taxes, share of water bill, will continue as per the existing lease.

Year	Annual Rent	
1	\$136,212.40	Through 12/31/2025
2	\$140,298.77

17	\$218,580.92	

Security:

The existing security deposit of \$21,146.10 will be increased to equal \$27,107.46, which is based upon the rent for the last two months of the new term.

Renewal Option:

Tenant will have two (2) five-year options to renew at a continuation of the base rent plus 3% annual escalations. Option must be exercised at least one year prior to the expiration of the prior term.

Mr. Robert Anton -3- May 6, 2024

Rent Concession: The base net rent will be waived for the 1st month of the lease. Tenant will

be responsible for additional rent during the concession period.

Broker: Hunt Corporate Services, Inc. to be paid by landlord, per separate

agreement.

All other lease terms shall remain the same. Please have lease amendments delivered to me for delivery to the tenant and tenant counsel.

Sincerely, Hunt Corporate Services, Inc.

David G. Hunt
